

## Home application

- For rice, noodles, soup, and cuisine

One of the secrets to making rice delicious is using Top Spring® Life Energy Water. Soak rice, brown rice, and germinated brown rice in the water for 10~20 minutes, drain the water, and soak them with the same amount of Top Spring® Life Energy Water for 1 minute and then drain the water. The water prevents the residual chlorine in tap water from destroying the nutrients, and it also removes agricultural chemicals.

No matter when you cook rice, noodles, or soup, Top Spring® Life Energy Water goes well with all dishes and brings out the original flavor of food. The water makes the cooking taste even better and remains freshness for its high anti-oxidation ability.

- Hair dyeing and perming

Washing your just-permed hair with Top Spring® Life Energy Water removes the chemical odor from dyeing or perming products while protecting the scalp.

- For pets

Let your pets drink Top Spring® Life Energy Water. It is beneficial to them. If you add Top Spring® Life Energy Water to an aquarium, fish will become healthier and more energetic while the tank stays cleaner. Also, bathing your pets with Top Spring® Life Energy Water will make them odor free.

## Commercial application

- Coffee, tea and beverages

In cafes, tea shops, and even convenience stores, using Top Spring® Life Energy Water instead of regular filtered or tap water to make coffee, tea, and beverages can easily brew more fragrant and delicious drinks. Its strong antioxidant properties can prolong the tasting time of beverages, such as preventing coffee from acidifying and tea from becoming bitter, leading to increased consumer satisfaction and higher revenue.

Additionally, due to its extremely fine water molecule clusters, it is easier to extract the essence of the ingredients. This means you can achieve the same concentration with less raw material, reducing ingredient costs and thereby increasing profitability.

- Produce the highest quality bottled beverages

Using Top Spring® Life Energy Water can produce high-quality bottled beverages with high antioxidant properties, such as bottled water, bottled tea, bottled coffee, and canned beer. Therefore, there is no need to label the bottle with the warning 'Please consume promptly after opening.' We offer food industry systems with a total processing capacity of 1,000 to 12,000 tons. Interested parties can contact the company directly.

- Food processing

The use of Top Spring® Life Energy Water provides better quality of food and more long-lasting freshness.

# Top Spring® Life Energy Water System

## The world's leading technology of multi-functional drinking water system and food ingredient improving Technology

Top Spring® Life Energy Water System is the most state-of-the-art technical product in the world. It produces Quantum Harmonic Oscillator (QHO) through a unique SEH® Super Energy Control System combined with other technologies, making Top Spring® Life Energy Water generate exclusive substantial anti-oxidation capability. For example, black tea or coffee made with Top Spring® Life Energy Water remain unchanged in taste after 6 minutes, 12 minutes, 18 minutes, one hour, or even overnight as if they have just been brewed 5 minutes ago, without bitterness. In contrast, with mineral water, deep sea water, R.O. water, ionized water, magnetic water, proton water, hydrogen ions water, water out of regular filters, or general energy water filters, the taste becomes bitter after just 5~10 minutes because of oxidation. Furthermore, while penetrating glasses, the QHO can make impure substances in glasses of soy sauce, wine, and vinegar reduced to little. Within 15~20 minutes, liquors will attain the same quality as those made over decades, and the quality won't return to its original condition; this function is much greater than that of filters with far-infrared or other so-called "energy stones". Only Aizia's Top Spring® Life Energy Water System possesses this unique function in the world. Through being certified by the Development Center for Biotechnology (DCB), Taiwan, Top Spring® Life Energy Water is capable of complementing effect in nutritional supplements.

Other water brands, including mineral water, deep sea water, R.O. water, ionized water, hydrogen ion water, magnetic water, proton water, water out of regular filters, and general energy water filters cannot present the following features from three experiments. However, Only the Top Spring® Life Energy Water System can make it.

1. Black, green tea or coffee made with Top Spring® Life Energy Water remain unchanged in taste after 6 minutes, 12 minutes, 18 minutes, one hour, or even overnight as if they have just been brewed 5 minutes ago, without bitterness. In contrast, with mineral water, deep-sea water, R.O. water, ionized water, magnetic water, proton water, other brands of filtered water, or filtered energy water, the taste becomes bitter after just 5-10 minutes because of oxidation.

2. Pour inexpensive whiskey, brandy, sake, kaoliang liquor, vodka, vinegar, and soy sauce into a small glass. Soak them with Top Spring® Life Energy Water in a water bath, using at least 20-30 times the volume of the items being soaked, for about 20-30 minutes. This will enhance their quality to that of aged products, thus increasing their value, which cannot be achieved by any other water in the world. If you are not in a hurry, you can place the entire unopened bottle into a container with at least 10 times the volume of Top Spring® Life Energy Water and soak it for 24 to 72 hours. Soaking a 6-year-old Johnnie Walker Red Label whiskey for this period will enhance its taste to that of 21 years or more.

3. Soak sea shrimps in tap water and Top Spring® Life Energy Water for 20 minutes then store in freezer of household refrigerator for about one month. The heads of shrimps in tap water will have blackened to also smell fishy; but not the heads of shrimps in Top Spring® Life Energy Water. Moreover, the shrimps in Top Spring® Life Energy Water will taste even better than those just bought from market.

Make tea or coffee by Top Spring® Life Energy Water after 6 minutes, 12 minutes, 18 minutes, one hour, or even overnight; its taste remains as good as freshly made.

Soaking alcohol, soy sauce, and vinegar with Top Spring® Life Energy Water can enhance the quality from lower grade to higher grade. For example, 6-year-old Johnnie Walker Red Label whiskey can be improved to a taste exceeding that of 21 years or more. For detailed information, please refer to the main text.

The shrimps are soaked in tap water for 20 minutes and then stored in a freezer for about one month. The heads of shrimps turn black and have a strong fishy smell.

The shrimps soaked with Top Spring® Life Energy Water are stored for one month in the freezer. The heads of shrimps neither turn black nor have a strong fishy smell. Moreover, when tasting, you will find the flavor is better than those fresh shrimps.

### Detailed Specifications

Amount expelled	6 ℓ/Min. (Water pressure at 2.5 kg)	LE-102SX-5	Manufacture Suggestion Price (M.S.P.)	USD\$300	
Total Capacity	102SX-5 5, 000ℓ	102MX-25	Filter Cartridge M.S.P.	USD\$200	
	102SX-12 12, 000ℓ	102MX-35	Manufacture Suggestion Price (M.S.P.)	USD\$600	
	(As tap water's residual chlorine 0.7 ppm)		Filter Cartridge M.S.P.	USD\$250	
Size	102SX-5 15, 5cm( W ) 19, 5cm( H )	(BODY ONLY)	LE-102MX-25	Manufacture Suggestion Price (M.S.P.)	USD\$1,500
	102SX-12 15, 5cm( W ) 32, 0cm( H )	(BODY ONLY)	LE-102MX-25	Filter Cartridge M.S.P.	USD\$500
	102MX-25 32, 0cm( L ) 19, 5cm( W ) 34, 5cm( H )	(BODY ONLY)	LE-102MX-35	Manufacture Suggestion Price (M.S.P.)	USD\$1,800
	102MX-35 32, 0cm( L ) 19, 5cm( W ) 34, 5cm( H )	(BODY ONLY)	LE-102MX-35	Filter Cartridge M.S.P.	USD\$600

# Top Spring® Life Energy Water System

## The world's leading multi-functional drinking water system and food ingredient improving technology

## The water produced by the Top Spring® Life Energy Water System has better properties than any mineral water in the world.

Extraordinary direct-from-tap potable water

Super anti-oxidation and reduction ability

Enhance the value of ingredients through water bath soaking

Extend the freshness of food

Reduce the entry of oxides into the human body

Dozens of different household and commercial applications

significantly enhance your quality of life.

**Aizia**  
Top Spring Life Energy Water System

Aizia Tech

Line

LE-102MX/SX  
Made in Taiwan

## The water produced by the Top Spring® Life Energy Water System has better properties than any mineral water in the world.

### Home application

- Soak in water: Upgrade low-grade wine, soy sauce, and vinegar to high-grade, and high-grade to aged quality.

Low-priced whiskey, brandy, sake, kaoliang liquor, vodka, vinegar, and soy sauce can be upgraded to aged quality by placing them in a glass container and soaking them in Top Spring® Life Energy Water for 15 to 30 minutes. This process enhances the value of these products. If you are not in a hurry, you can place the entire unopened bottle into a container with at least 10 times the volume of Top Spring® Life Energy Water and soak it for 24 to 72 hours. The unique quantum resonance technology of Top Spring® Life Energy Water can elevate the quality of the lowest-grade liquor, soy sauce, and vinegar to a higher level. For example, soaking a 6-year-old Johnnie Walker Red Label whiskey can enhance its taste to that of a 21-year-old whiskey. This is a function that no other mineral water can achieve.

Fermented products like liquor, soy sauce, and vinegar contain trace amounts of methanol and formaldehyde, which need to mature slowly in storage tanks over several years to decades. During this time, the levels of methanol and formaldehyde gradually decrease, resulting in a more aromatic and smoother taste, but this also significantly increases the cost and selling price. If using Top Spring® Life Energy Water to soak a 6-year-old Johnnie Walker Red Label whiskey, its taste can be enhanced to that of a 21-year-old whiskey, creating extremely high economic value.

- Can brew even more delicious beverages

Water is the mother of tea and the soul of coffee. When extracting coffee with filter paper, water makes up 98.5% and coffee only 1.5%, highlighting the importance of water. Using Top Spring® Life Energy Water to brew any tea, herbal tea, or coffee can enhance the flavor and aroma. Brewing any beverage with this water can also reduce the intake of oxidants, making the body healthier. (Please refer to the 'Antioxidant Capacity Experiment Report' and 'Antioxidant Taste Test' on the inside pages.)

- Remove pesticides from fruits and vegetables, and antibiotics and heavy metals from fish and meat.

Soak vegetables, fruits, meat, and seafood in Top Spring® Life Energy Water for 15~30 minutes, discard the water, and soak them with the same amount of Top Spring® Life Energy Water for 1 minute and discard. This process can remove pesticide residues and other harmful substances from the food.

According to News, research by Dr. Pi-Shia Lin from National Taiwan University shows that organic vegetables are often given too much nitrogen-based fertilizer in order to increase production yield. Therefore, some organic vegetables produced in this way are usually found with excessive nitrates (about 5,000ppm). Soaking organic vegetables in Top Spring® Life Energy Water the excessive nitrates can decrease.

Soak meat, poultry, crabs, and fish in Top Spring® Life Energy Water for about 15-30 minutes, then discard the water. Soak them again in the same amount of fresh water for 1 minute and discard. This process can remove some fishy odors.

- Improve quality of live seafood

After buying some live seafood products, soak them in Top Spring® Life Energy Water for 10~24 hours. This helps remove harmful substances in their bodies, improving the freshness and quality of seafood.

As air pollution is getting more severe day after day, pollutants in the air, like dioxins, are everywhere. Therefore, soaking all kinds of food, including organic or regular ones, in this water does help improve the value of the food in terms of health and nutrition.

- Keep food fresh

Soaking vegetables, meat, and seafood in Top Spring® Life Energy Water for approximately 15~30 minutes helps them last longer and removes the fishy smell. Afterward, strain vegetables and fruits and preserve them in the fridge section in a refrigerator. For seafood, put them into a plastic food container filled with 80% of Top Spring® Life Energy Water and preserve them in a freezer section. In this way, the colors of vegetables, meat, and seafood will last longer, and all foods stay fresh, which not only enhances the flavor but also improve its nutrition values.

**Top Spring® Life Energy Water System Not only offers the best direct-from-tap potable water. But also effectively elevates the quality of food ingredients. Beyond your imagination: Top Spring® incredibly enhances the value of food.**

**Certified by the Development Center for Biotechnology (DCB), Taiwan with animal testing, Top Spring® Life Energy Water elevates the benefits of nutritional supplements. Using Top Spring® Life Energy Water in combination with nutritional supplements SEH® 997 (Concentrated Solution) in chemo-therapy achieves about 30% higher leukocytes in animals relative to using pure water.** (Please refer to the experiment on the far right of the inside page)

Aizia Technology, Inc. is dedicated to various biotechnology innovations beneficial to human health. In collaboration with SEH Biotechnology Co., we have developed the Top Spring® Life Energy Water Generator. This system is distinctly different from conventional water systems on the market due to the unique SEH® Bio-Energy Technology and its integration with multiple techniques. The Top Spring® Life Energy Water Generator not only serves as an excellent drinking water system but also functions as a genuine food quality enhancement system that improves the value and freshness of ingredients. SEH Biotech's cutting-edge technology endows this system with powerful antioxidant capabilities and energy. In addition to providing users with more functions and superior quality than mineral water, it can also enhance the freshness and quality of various ingredients and offers numerous applications for both household and commercial use.

Another highly desirable characteristic of Top Spring® Life Energy Water System is its capability to enhance food nutritional value. Illness can partly be attributed to consuming too many oxidized or problematic foods. As people age, their ability to resist free radicals diminishes, making them more susceptible to illness from consuming stale or poor-quality food. Especially for families who still gather for meals, the freshness of food remains a critical health issue. Food that has biodegraded or oxidized 15%~30% has a potentially serious impact on health. With families typically keeping food in the freezer whose temperature is around -20°C to be insufficient for long-term storage, foods have to be properly stored around -50°C ~ -60°C. Fresh shrimp kept in the freezer for 3-5 days will result in the heads starting to blacken coupled with a foul odor. Such a problem is easily overcome by immersing shrimps in Top Spring® Life Energy Water for 20 minutes, and putting them in a crisper filled with Top Spring® Life Energy Water to freeze for one month. The shrimp heads will not blacken and smell bad afterward, but they will taste sweet and fresh, proving the food preservation function of Top Spring® Life Energy Water.

Top Spring® Life Energy Water molecules have also been shown by Toray Research Center in Japan to display 51Hz, with such electromagnetic oscillation able to cleanse pesticides on vegetables and fruits by immersion for 20 minutes to result in better taste. If soaking chicken, duck, fish, and meat, in addition to keeping the food fresher, it can also remove some fishy smells. Making such foods less harmful to benefit everyone.

Top Spring® Life Energy Water System not only can remove harmful substances and heavy metals but also has been proven experimentally by a very prestigious lab, Toray Research Center in Japan. Top Spring® Life Energy Water is measured as 51 Hz, the tiniest cluster of water molecules, and is characterized as high reduction power. Its unique Bio Energy Control System equips regular water with higher anti-oxidation ability, improves food with higher quality, maintains freshness of food, and generates high interface activities. All these, other drinking water equipment and so-called energy water filters can not do! Moreover, utilizing the small size of water molecule clusters can remove pesticide residues and air-polluted impurities from ingredients through soaking, thereby enhancing the value of the food. This allows you to spend less money while obtaining the healthiest and safest nutrients from your food. In addition to its various special functions and wide range of applications, "Top Spring® Life Energy Water" significantly improves your quality of life.

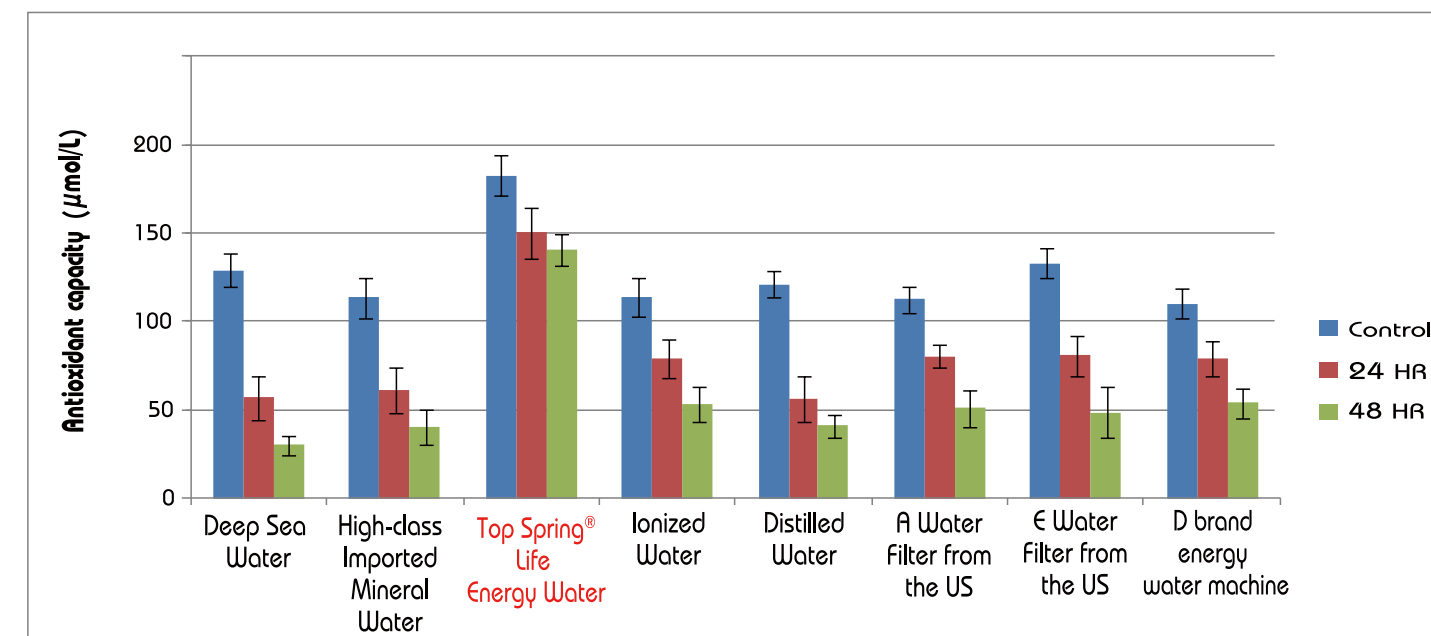

### Method of the anti-oxidant taste tests:

Ingredients: 1.) Lipton black tea bag 2 g. 2.) UCC French Roasted filter black coffee 8 g.  
 Test method: 1.) Use 150ml of 95°C hot water to brew Lipton Black Tea for 5 minutes. After pouring, leave it for 6, 12, 18 minutes to test.  
 2.) Use 130ml of 95°C hot water to brew UCC French Roasted filter black coffee. After pouring, leave it for 6, 12, 18 minutes to test.

Test item / Test water	Lipton black tea (leave for 6 minutes)	Lipton black tea (leave for 12 minutes)	Lipton black tea (leave for 18 minutes)	UCC coffee (leave for 6 minutes)	UCC coffee (leave for 12 minutes)	UCC coffee (leave for 18 minutes)
Top Spring® Life Energy Water	Smooth and Aromatic	Smooth and Aromatic	Smooth Slight astringency Slight aroma	Smooth and Aromatic	Smooth and Aromatic	Smooth Slight astringency Slight aromatic
Mineral water from France and other countries in the world	Slight astringency	Little astringency Slight bitterness	Medium astringency Slight bitterness	Little astringency Slight bitterness	Little astringency Slight bitterness Slight acidity	Medium astringency Medium acidity
Deep sea water	Little astringency Slight bitterness	Medium astringency	Medium astringency	Little astringency Slight acidity	Medium astringency Slight bitterness Slight acidity	Medium astringency Little acidity
Electrolyze water	Slight astringency	Little astringency	Medium astringency Slight bitterness	Little astringency Slight acidity	Medium astringency Slight bitterness	Strong astringency Slight bitterness Medium acidity
R.O. Water	Slight astringency Slight aroma	Little astringency	Strong astringency Strong bitterness	Slight astringency	Medium astringency	Medium astringency
Water Filter imported from the U.S. and Germany	Slight astringency Slight aroma	Little astringency	Medium astringency	Slight astringency Slight aroma	Little astringency Slight aroma	Little astringency
Medical stone mineral water	Slight astringency	Little astringency	Medium astringency	Slight astringency	Strong astringency Strong bitterness	Strong astringency Strong bitterness
Charcoal-filtered water	Little astringency	Little astringency	Medium astringency	Slight astringency	Strong astringency Strong bitterness	Strong astringency Strong bitterness

## The anti-oxidation ability of antrodia cinnamomea fruiting body soluble in different water within 48 Hours

National Yang-Ming University Medical School, Dr. Xu-bei Wu

This experiment is authorized to be conducted by Dr. Xu-bei Wu from School of Medicine, National Yang-Ming University. The experiment is concerning different performance on anti-oxidation when Anrodia cinnamomea is put into several brands of water, including Top Spring® Life Energy Water. Because Anrodia cinnamomea has well anti-oxidation capability, it serves as an object in the experiment. At the moment of putting Anrodia cinnamomea into eight water brands, the performance on anti-oxidation of every brand should be similar in theory, but it is not the truth. In effect, anti-oxidation ability in Top Spring® Life Energy Water is much higher than the average of other seven water brands, about 35%. This gap appears more distinct after 24 hours and 48 hours. Furthermore, the performance after 48 hours in Top Spring® Life Energy Water is surprisingly superior to the initial performance of other water brands. This experiment can be proof that Top Spring® Life Energy Water has extraordinary anti-oxidation ability. It also explains why tea with Top Spring® Life Energy Water tastes still mellow even overnight, merely like freshly made, and why Aizia's water system has authority to keep food fresh.

Statistics and experimental data aside, another way to prove the powerful anti-oxidation ability of Top Spring® Life Energy Water is to make tea or coffee. Tea or coffee made with other brands of mineral or filtered water inevitably turns bitter after 30 minutes or several hours. But not with Top Spring® Life Energy Water. Such beverages remain unchanged in taste after 6 minutes, 12 minutes, 18 minutes, one hour, or even overnight to show the amazing anti-oxidation ability. Aizia Technology authorized Dr. Xu-bei Wu of the School of Medicine, National Yang-Ming University of Taiwan to compare anti-oxidation ability between other brands of water and Top Spring® Life Energy Water to have shown convincing results, which are as above.

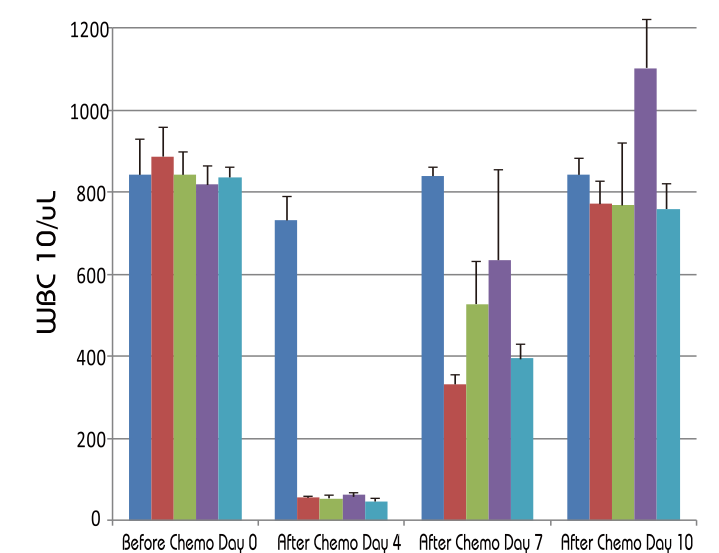

## The experiment proving Top Spring® Life Energy Water elevates benefits of nutritional supplements

Good nutritional supplements and milk need good water to complement their efficacy. If the water is not good enough, even top nutritional supplements cannot present best effects. **Certified by Development Center for Biotechnology (DCB)**, Top Spring® Life Energy Water is capable of complementing effect in nutritional supplements.

The **Development Center for Biotechnology (DCB)**, Taiwan, accomplishing the Cyclophosphamide-induced leucopenia model, confirmed that after mice administered the chemotherapy drugs "Cyclophosphamide", administration of G-CSF white blood cell growth hormone in the second to fourth days, and feed the mice with SEH® 997 Concentrated Solution and Top Spring® Life Energy Water, and SEH® 997 Concentrated Solution with R.O. water to compare with each other, and the mice in each group were phlebotomized and also conduct complete blood cell (CBC) count and differential blood cell (DC) count on the 4th、7th、and 10th day, results are as the following:

The experimental results show that the mice which had SEH® 997 Concentrated Solution and Top Spring® Life Energy Water in the fourth group had the best white blood cells, Lymphocytes, Monocyte, Granulocyte enhancement after administering the chemotherapy drugs, and also the effect is better than administering G-CSF. This evidenced that taking SEH® 997 Concentrated Solution in advance has great protective effects to the mice. Meanwhile, you can find the result in the fourth group that the mice which had Top Spring® Life Energy Water are much better than the result in the fifth group which had the same condition with the forth group but the mice had different water, such as R.O. water. It also proves that the **Top Spring® Life Energy Water has the function to enhance effectiveness of nutritional supplements.**

The comparison chart of white blood cells of different group after Cyclophosphamide administration on the day 0, 4, 7 and 10

### The Comparison table of white blood cells of mice injecting Cyclophosphamide in each group

Group	Before Chemo Day 0	After Chemo Day 4	After Chemo Day 7	After Chemo Day 10
Normal Mice (without chemotherapy)	842	731	838	843
RO Water+Cyclophosphamide (chemotherapy drug)	887	56	333	772
RO Water+Cyclophosphamide (chemotherapy drug)+G-CSF	843	51	528	768
Top Spring Water+Cyclophosphamide+SEH® 997	818	63	633	1101
RO Water+Cyclophosphamide+SEH® 997	835	46	397	757
