

The world's leading technology of multi-functional drinking water system and food ingredient improving Technology

Top Spring® Life Energy Water System

Top Spring® Life Energy Water System is the most state-of-the-art technical product in the world. It produces Quantum Harmonic Oscillator (QHO) through a unique SEH® Super Energy Control System combined with other technologies, making Top Spring® Life Energy Water generate exclusive substantial anti-oxidation capability. For example, black tea or coffee made with Top Spring® Life Energy Water remain unchanged in taste after 30 minutes, several hours, or even overnight as if they have just been brewed 5 minutes ago, without bitterness. In contrast, with mineral water, deep sea water, R.O. water, ionized water, magnetic water, proton water, hydrogen ions water, water out of regular filters, or general energy water filters, the taste becomes bitter after just 5~10 minutes because of oxidation. Furthermore, while penetrating glasses, the QHO can make impure substances in glasses of soy sauce, wine, and vinegar reduce to little. Within 15~20 minutes, liquors will attain the same quality as those made over decades, and the quality won't return to original condition; this function is much greater than that of filters with far-infrared or other so-called "energy stones". Only Aizia's Top Spring® Life Energy Water System possesses this unique function in the world. Through having certified by Development Center for Biotechnology (DCB), Taiwan, Top Spring® Life Energy Water is capable of complementing effect in nutritional supplements.

Other water brands, including mineral water, deep sea water, R.O. water, ionized water, hydrogen ion water, magnetic water, proton water, water out of regular filters, and general energy water filters cannot present following features from three experiments. However, Only the Top® Spring Life Energy Water System can make it.

1. Black, green tea or coffee made with Top Spring® Life Energy Water remain unchanged in taste after 30 minutes, several hours, or even overnight as if they have just been brewed 5 minutes ago, without bitterness. In contrast, with mineral water, deep-sea water, R.O. water, ionized water, magnetic water, proton water, other brands of filtered water, or filtered energy water, the taste becomes bitter after just 5-10 minutes because of oxidation.
2. Immerse a glass of bargain whisky, brandy, Japanese sake, vodka, soy sauce or vinegar in 20-30 times the volume of Top Spring® Life Energy Water. Incredibly only after 20-30 minutes, the taste is upgraded to be very smooth to equal that of high-priced counterparts, to thus improve value of liquor, soy sauce, and vinegar. In short, Top Spring® Life Energy Water has an extraordinary function unmatched by other brands of water. Place a whole sealed bottle of liquor, soy sauce or vinegar in a bucket with 20-plus times the volume of Top Spring® Life Energy Water for at least 5 hours to improve quality. A 6-year old "Johnnie Walker" Red Label can be upgraded to 21-years or better for amazing qualitative, value improvement.
3. Soak sea shrimps in tap water and Top Spring® Life Energy Water for 20 minutes to then store in freezer about one month. The heads of shrimps in tap water will have blackened to also smell fishy; but not the heads of shrimps in Top Spring® Life Energy Water. Moreover, the shrimps in Top Spring® Life Energy Water will taste even better than those just bought from market.

Make tea or coffee by Top Spring® Life Energy Water after 30 minutes, several hours, or even overnight; its taste remains as good as freshly made.

Top Spring® Life Energy Water has "specific energy" that can substantially upgrade low-end liquor, soy sauce and vinegar by immersing glassfuls in the water for 20 minutes. Immerse sealed JOHNNIE WALKER Red Label Whisky (6Y) in the water to achieve 21-year aging in much shorter period.

The shrimps are soaked in tap water for 20 minutes then stored in a freezer about one month. The heads of shrimps turn to black and have strong fishy smell.

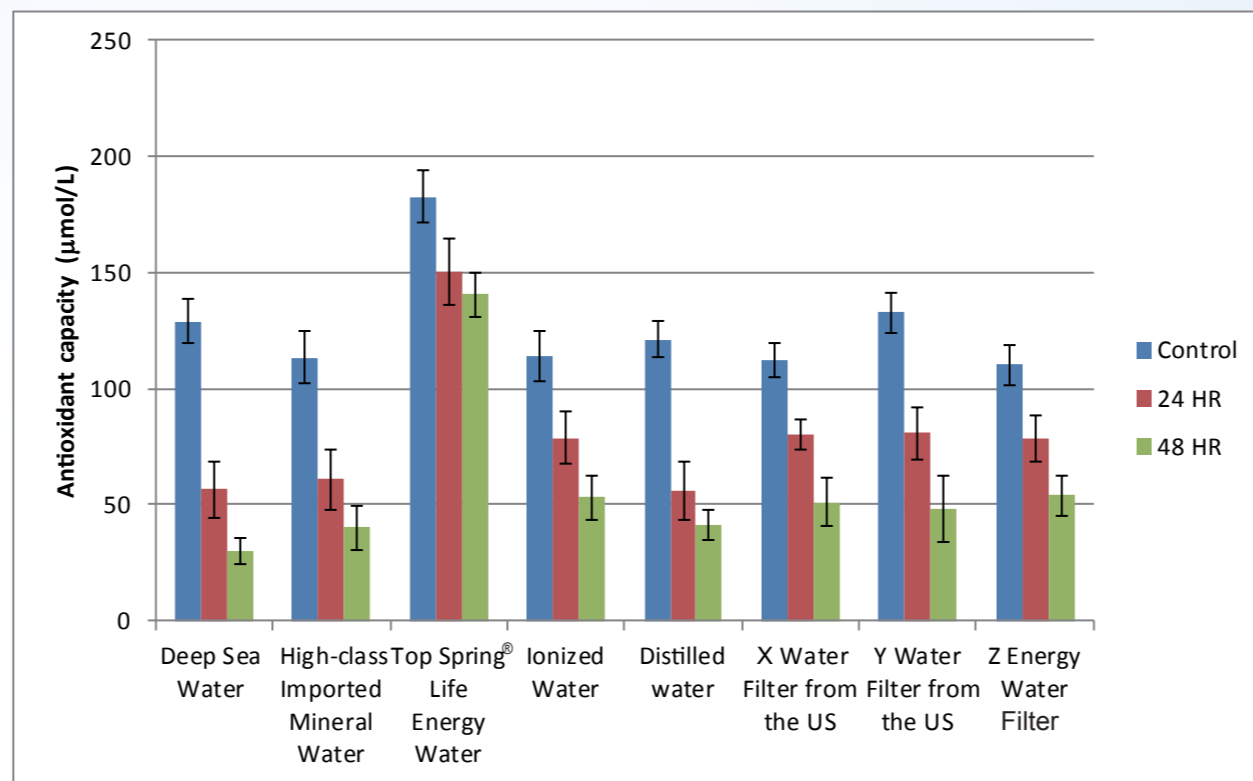

The shrimps soaked with Top Spring® Life Energy Water are stored one month in the freezer. The heads of shrimps neither turn to black nor have strong fishy smell. Moreover, when tasting, you will find the flavor is better than those fresh shrimps.

Top Spring® Life Energy Water System not only can remove harmful substances and heavy metals, but also has been proven experimentally by a very prestigious lab, Toray Research Center in Japan. Top Spring® Life Energy Water is measured as 51 Hz, the tiniest cluster of water molecules, and is characterized as high reduction power and high oxygen content. Its unique Bio Energy Control System equips regular water with higher anti-oxidization ability, improves food with higher quality, maintains freshness of food and generates high interface activities. All these, other drinking water equipment and so-called energy water filters cannot do!

More than that, with such electromagnetic oscillation able to cleanse pesticides on vegetables and fruits by immersing, even antibiotics and growth hormone in meat and fish will be similarly cleansed to make such foods less harmful. This allows you to obtain the healthiest and safest nutrients in food with little expense. Top Spring® Life Energy Water has many unique features which are ready for various applications. It can highly improve your living quality.

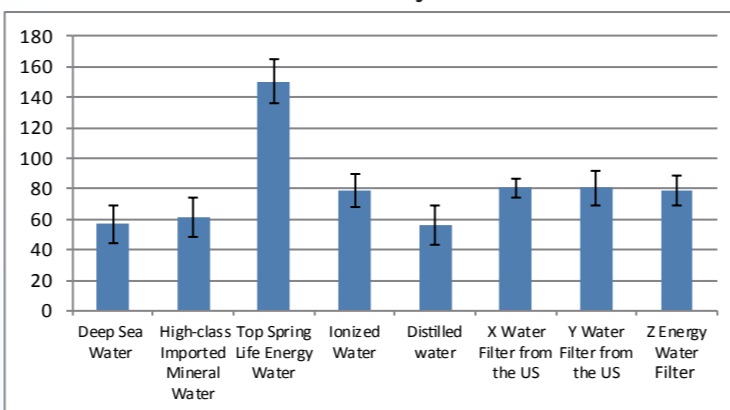

The anti-oxidation ability of antrodia cinnamomea fruiting body soluble in different water within 48 Hours

National Yang-Ming University Medical School, Dr. Xu-bei Wu

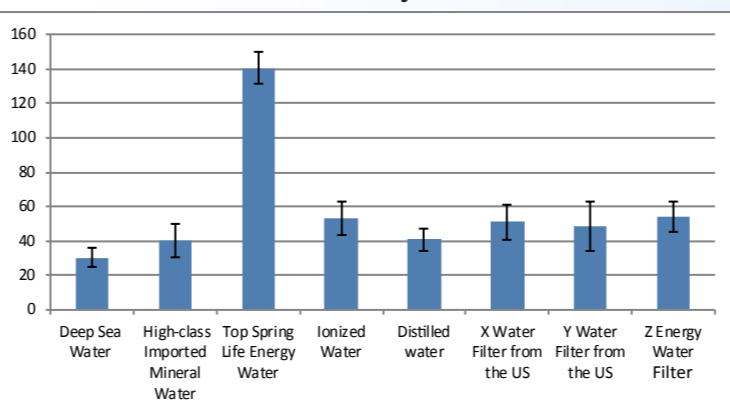

This experiment is authorized to be conducted by Dr. Xu-bei Wu from School of Medicine, National Yang-Ming University. The experiment is concerning different performance on anti-oxidation when Antrodia cinnamomea is put into several brands of water, including Top Spring® Life Energy Water. Because Antrodia cinnamomea has well anti-oxidation capability, it serves as an object in the experiment. At the moment of putting Antrodia cinnamomea into eight water brands, the performance on anti-oxidation of every brand should be similar in theory, but it is not the truth. In effect, anti-oxidation ability in Top Spring® Life Energy Water is much higher than the average of other seven water brands, about 35%. This gap appears more distinct after 24 hours and 48 hours. Furthermore, the performance after 48 hours in Top Spring® Life Energy Water is surprisingly superior to the initial performance of other water brands. This experiment can be proof that Top Spring® Life Energy Water has extraordinary anti-oxidation ability. It also explains why tea with Top Spring® Life Energy Water tastes still mellow even overnight, merely like freshly made, and why Aizia's water system has authority to keep food fresh.

Anti-oxidation ability after 24 hours

Anti-oxidation ability after 48 hours

Detailed Specifications

Amount expelled	6 ℓ/Min. (Water pressure at 2.5Kg)	
Total Capacity	102SX-5	5,000ℓ
	102SX-12	12,000ℓ
	102MX-10	10,000ℓ
	102MX-25	25,000ℓ (As tap water's residual chlorine 0.7 ppm)
Size	102SX-5	15.5cm(W) 19.5cm(H) (BODY ONLY)
	102SX-10	15.5cm(W) 32.0cm(H) (BODY ONLY)
	102MX-25	32.0cm(L) 19.5cm(W) 34.5cm(H) (BODY ONLY)

Top Spring® Life Energy Water System

LE-102MX

The world's leading multi-functional drinking water system and food ingredient improving technology

- Extraordinary direct-from-tap potable water**
- Elevates quality of food ingredients**
- No plug-in needed, No waste water**
- Also dozens of application to household and business**
- Highly Improving your living quality**

Made in Taiwan

Top Spring® Life Energy Water System not only offers the best direct-from-tap potable water, but also effectively elevates quality of food ingredients

Beyond your imagination: Top Spring® incredibly enhances value of food

Certified by the Development Center for Biotechnology (DCB), Taiwan with animal testing,

Top Spring® Life Energy Water elevates benefits of nutritional supplements.

Using Top Spring® Life Energy Water in combination with nutritional supplements (SEH® 997) in chemo-therapy achieves about 30% higher leukocytes in animals relative to using ordinary water.

Aizia Technology, Inc. focuses on developing biotechnologies to enhance human well-being to have created Top Spring® Life Energy Water System in partnership with its affiliate, SEH Biotechnology Co., Ltd. Distinct from other water filtration systems, Top Spring® Life Energy Water System integrates the globally unique SEH® Super Energy Control System and other technologies to be the leading direct-from-tap potable water system that also improves food nutritional value and freshness. SEH Biotechnology's cutting-edge know-how achieves extremely powerful antioxidant function and energy to offer potable water almost identical to that in human bodies, whose water content is regarded as difficult to oxidize. Top Spring® Life Energy Water System even topples conventional wisdom to offer potable water even better in quality than mineral water. Besides being indispensable in homes, our system is ideal for various commercial applications to be more convenient, health-enhancing than mass market bottled water.

Another highly desirable characteristic of Top Spring® Life Energy Water System is its capability to enhance food nutritional value. Besides issues as pesticide and other environmental pollution, consumers today also worry about getting sick due to eating stale or improperly preserved foods. Such problems worsen with aging that compromises immunity to result in greater damage to health by free radicals. Especially for families who still gather for meals, freshness of food remains a critical health issue. Food that has biodegraded or oxidized 15%~30% has potentially serious impact on health. With families typically keeping food in freezer whose temperature being around -10°C to be insufficient for long-term storage, foods have to be properly stored around -50°C~ -60°C. Fresh shrimps kept in freezer for 3-5 days will result in the heads starting to blacken coupled with foul odor. Such problem is easily overcome by immersing shrimps in Top Spring® Life Energy Water for 20 minutes, putting them in a crisper filled with Top Spring® Life Energy Water to freeze for one month. The shrimp heads still will not blacken and smell badly afterwards to taste sweet and fresh, to prove the food preservation function of Top Spring® Life Energy Water.

Top Spring® Life Energy Water molecules has also been shown by Toray Research Center in Japan to display 51Hz, with such electromagnetic oscillation able to cleanse pesticides on vegetables and fruits by immersion for 20 minutes to result in better taste. Even antibiotics and growth hormone in meat and fish will be similarly cleansed to make such foods less harmful to benefit everyone.

Top Spring® Life Energy Water also has "specific energy" that can substantially upgrade low-end liquor, soy sauce and vinegar by immersing glassfuls in the water for 20 minutes. Liquor, soy sauce and vinegar have miniscule methyl alcohol and formaldehyde, which help to preserve, while being reduced, content in barrel for slow maturation over years or decades to eventually taste pleasant and smooth albeit with dramatically increased cost and price. Immerse sealed JOHNNIE WALKER Red Label Whisky (6-Year) in Top Spring® Life Energy Water to achieve 21-year aging in much shorter period.

Statistics and experimental data aside, another way to prove the powerful anti-oxidation ability of Top Spring® Life Energy Water is to make tea or coffee. Tea or coffee made with other brands of mineral or filtered water inevitably turns bitter after 30 minutes or several hours. But not with Top Spring® Life Energy Water. Such beverages remain unchanged in taste after 30 minutes, several hours, or even overnight to show the amazing anti-oxidation ability. Aizia Technology authorized Dr. Xu-bei Wu of the School of Medicine, National Yang-Ming University of Taiwan to compare anti-oxidation ability between other brands of water and Top Spring® Life Energy Water to have shown convincing results, which are on the overleaf.

The experiment proving Top Spring® Life Energy Water elevates benefits of nutritional supplements

Good nutritional supplements and milk need good water to complement their efficacy. If the water is not good enough, even top nutritional supplements cannot present best effects. Certified by Development Center for Biotechnology (DCB), Top Spring® Life Energy Water is capable of complementing effect in nutritional supplements.

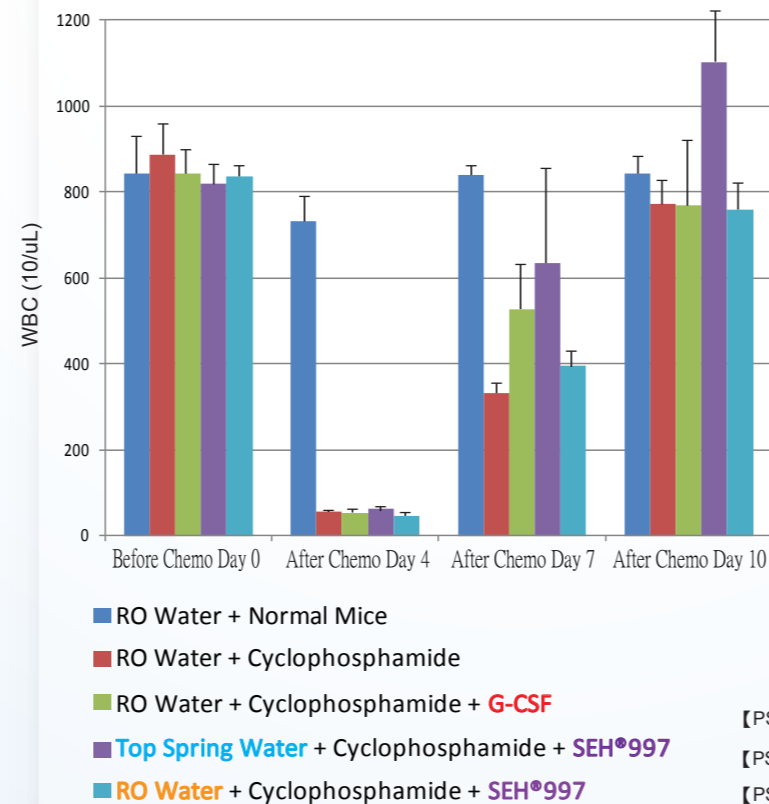

The Development Center for Biotechnology (DCB), Taiwan, accomplishing the Cyclophosphamide-induced leucopenia model, confirmed that after mice administered the chemotherapy drugs "Cyclophosphamide", administration of G-CSF white blood cell growth hormone in the second to fourth days, and feed the mice with SEH® 997 Concentrated Solution and Top Spring® Life Energy Water, and SEH® 997 Concentrated Solution with R.O. water to compare with each other, and the mice in each group were phlebotomized and also conduct complete blood cell (CBC) count and differential blood cell (DC) count on the 4th, 7th, and 10th day, results are as the following:

The experimental results show that the mice which had SEH® 997 Concentrated Solution and Top Spring® Life Energy Water in the fourth group had the best white blood cells, Lymphocytes, Monocyte, Granulocyte enhancement after administering the chemotherapy drugs, and also the effect is better than administering G-CSF. This evidenced that taking SEH® 997 Concentrated Solution in advance has great protective effects to the mice. Meanwhile, you can find the result in the fourth group that the mice which had Top Spring® Life Energy Water are much better than the result in the fifth group which had the same condition with the forth group but the mice had different water, such as R.O. water. It also proves that the Top Spring® Life Energy Water has the function to enhance effectiveness of nutritional supplements.

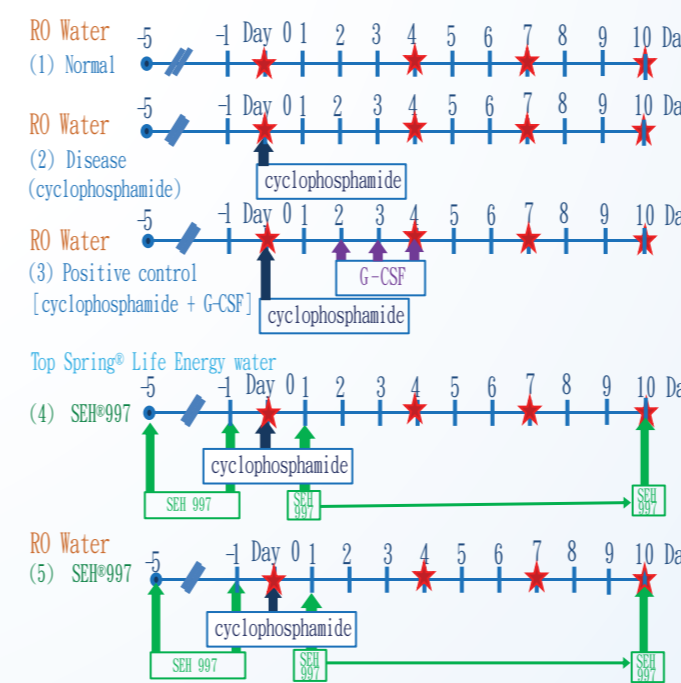

The Comparison table of white blood cells of mice injecting Cyclophosphamide in each group

Group	Before Chemo Day 0	After Chemo Day 4	After Chemo Day 7	After Chemo Day 10
RO Water+Normal Mice	842	731	838	843
RO Water+Cyclophosphamide	887	56	333	772
RO Water+Cyclophosphamide +G-CSF	843	51	528	768
Top Spring Water+Cyclophosphamide+SEH®997	818	63	633	1101
RO Water+Cyclophosphamide+SEH®997	835	46	397	757

The comparison chart of white blood cells of different group after Cyclophosphamide administration on the day 0, 4, 7 and 10

The timeline of Cyclophosphamide-induced leucopenia model experiments

[PS1] SEH®997 Use Method : BID (Every day Twice) From Day-5 to Day-1, and Day1-10

[PS2] Phlebotomize ★0th day before chemotherapy, and 4th, 7th, 10th day after chemotherapy

[PS3] N=10 Mice

Home application

● Keep food fresh

Soaking vegetables, meat and seafood in Top Spring® Life Energy Water for approximately 15~30 minutes helps them last longer and remove fishy smell. Afterwards, strain vegetables and fruits and preserve them in fridge section in a refrigerator. For meat and seafood, put them into a plastic food container filled with 80% of Top Spring® Life Energy Water and preserve them in a freezer section. In this way, the colors of vegetables, meat and seafood will last longer, and all foods stay fresh, which not only enhances the flavor, but also improve its nutrition values.

According to CTITV News, a research of by Dr. Pi-Shia Lin from National Taiwan University shows that the organic vegetables are often given too much nitrogen-based fertilizer in order to increase production yield. Therefore, some of organic vegetables produced in this way are usually found with excessive nitrates (about 5,000ppm). Soaking organic vegetables in Top Spring® Life Energy Water can remove the excessive nitrates.

● Remove agricultural chemicals, antibiotics and heavy metals from food

Soak vegetables, fruits, meat, and seafood in Top Spring® Life Energy Water for 15~30 minutes, drain the water, and then rinse them with Top Spring® Life Energy Water. Through this, harmful substances, such as agricultural chemical residue and antibiotics in vegetables, fruits, meat, and seafood, can be removed.

● Improve quality of live seafood

After buying some live seafood products, soak them in Top Spring® Life Energy Water for 10~24 hours. This helps remove harmful substances in their bodies, improving freshness and quality of seafood.

As air pollution is getting severer day after day, pollutants in the air, like dioxins, are everywhere. Therefore, soak all kinds of food, including organic or regular one, in this water does help improve the values of the food in terms of health and nutrition.

● For drinking

To make tea or coffee with Top Spring® Life Energy Water not only reduces consumption of tea or coffee, but also makes them taste even better. The taste will remain the same after hours or even overnight, as the water slows down oxidation. Using this water for milk and drinks gives you better health.

Immerse a glass of bargain whisky, brandy, Japanese sake, vodka, soy sauce or vinegar in 20~30 times the volume of Top Spring® Life Energy Water. Incredibly only after 20~30 minutes, the taste is upgraded to be very smooth to equal that of high-priced counterparts, to thus improve value of liquor, soy sauce, and vinegar. In short, Top Spring® Life Energy Water has an extraordinary function unmatched by other brands of water. Place a whole sealed bottle of liquor, soy sauce or vinegar in a bucket with 20-plus times the volume of Top Spring® Life Energy Water for at least 5 hours to improve quality. A 6-year old "Johnnie Walker" Red Label can be upgraded to 21-years or better for amazing qualitative, value improvement. The alcohol can be added with 5% of Top Spring® Life Energy Water, while vinegar and soy sauce, 30%. In this way, it brings out the most natural and smoothest taste. The use of soy sauce is reduced without the taste compromised, and the ingestion of salt is reduced as well for better health and economical budget.

● For rice, noodles, soup, and cuisine

One of the secrets to making rice delicious is using Top Spring® Life Energy Water. After soaking rice, brown rice, and germinated brown rice in the water for 10~20 minutes and rinsing them with Top Spring® Life Energy Water, the water prevents the residual chlorine in tap water from destroying the nutrients, and it also removes agricultural chemicals and heavy metals. Moreover, the water also preserves nutrients and helps make delicious cooked rice. Top Spring® Life Energy Water has powerful anti-oxidation ability, so with its freshness of cooked rice can last longer. Plants with that rice-washing water grow stronger, and no water is wasted.

No matter when you cook rice, noodles, or soup, Top Spring® Life Energy Water goes well with all dishes and brings out the original flavor of food. The water makes the cooking taste even better and remains freshness for its high anti-oxidation ability.

● Hair dyeing and perming

Washing your just-permed hair with Top Spring® Life Energy Water removes the chemical odor from dyeing or perming products while protecting the scalp.

● For pets

Let your pets drink Top Spring® Life Energy Water. It is beneficial to them. If you add Top Spring® Life Energy Water to an aquarium, fish will become healthier and more energetic while the tank stays cleaner. Also, bathing your pets with Top Spring® Life Energy Water will make them odor free.

Commercial application

● Food processing

The use of Top Spring® Life Energy Water provides better quality of food and more long-lasting freshness.

● Coffee, tea and beverages

Using Top Spring® Life Energy Water to make coffee, tea or other beverages in place of filtered or tap water makes the drinks tastier. Top Spring® Life Energy Water not only provides strong anti-oxidation capability, but also makes the drinks taste the same even after an extended period of time. For example, coffee is less likely to go sour, and the tea stays sweet without becoming bitter.

Agricultural applications

● When it comes to farming, soak seeds in Top Spring® Life Energy Water for 30 minutes before sowing. As a result, crops will grow stronger.

● Mushroom growing: The use of Top Spring® Life Energy Water in growing mushroom can improve quality and quantity of production yield.

● Vegetable, fruit and flower growing: The use of Top Spring® Life Energy Water in irrigation improves quality and quantity of production yield.

● In animal husbandry, feeding your chickens, ducks, pigs, cows, sheep etc., with Top Spring® Life Energy Water reduces the odor of excrement, increases their immunity, and improves the quality and yield of production.

● For egg production, the use of Top Spring® Life Energy Water helps chickens lay fresher eggs and makes the eggs last longer.

● In aquaculture, immersing seafood in Top Spring® Life Energy Water for 10~20 minutes and putting it in a freezer will remain freshness of seafood and last for months. Adding the water to in the base water for fish fry growing enhances fries' immunity and makes them grow stronger and healthier.

We also provide Top Spring® Life Energy Water System in large models for industrial and commercial applications.
